

Technical data sheet

MXEvo - One-piece Block

MXEvo is the new generation of one-piece blocks developed by Wichard - Profurl. The standard captive pin version exists in three sizes. **This range will replace step by step the current MX range available as an option on NEX flying sail furlers.**

Main MXEvo features:

- > Dedicated to heavy load applications
- > Impressive working and breaking load limits
- > Captive pin
- > Becket function to make tackles
- > Rope kept on track thanks to the fins
- > Optimized weight and dimensions
- > Easy opening – Easy rope installation
- > 3 sizes
- > Limited rope wear thanks to the track conception
- > Monobloc item (without mechanical part) for a better reliability
- > For ropes from 8 to 14mm

MXEvo with standard captive pin

Thanks to the leash, this MXEvo version can't loose its pin while opening, manipulating and closing the block. The pin is forged in high-resistant 17.4PH stainless steel.

Applications

- > 2:1 halyard purchase: mainsail, spinnaker, gennaker
- > Flying sail furler terminals: tensioning at the top or from the bottom

MXEvo: captive pin
